

We have solutions to limit the spread of harmful bacteria

Hospital stays involving patients infected with *C. difficile* have tripled in the past decade and the number of deaths increased by 400% between 2000 and 2007. These numbers underline the importance of finding solutions to fight these infections.

We offer

a range of innovative products aiming to limit the spread of pathogens (*C. difficile*, VRE, MRSA) and hence to reduce the risk of infection.

Hygienic Covers®

Designed for the safe collection, transportation and disposal of bodily fluids. The unique super-absorbent pad included in each bag turns liquid waste into gel within seconds. Used with the Commode Chair, Hygie® Urinal Support and Hygie® Emesis Support.

Hy21® Support

Used with Hygie Hygienic Covers®, the hy21® Bedpan Support replaces the standard and orthopedic bedpans by offering a 2-in-1 design which combines the benefits of both bedpan types. The revolutionary hy21® technology facilitates handling and use for all patients requiring a bedpan.

Wash Gloves

Hygie® Disposable Wash Gloves are pre-moistened, no water required, with a gentle hypoallergenic cleansing lotion.

- ✓ Prevent cross contamination
- ✓ Complete bathing for bedridden patients
- ✓ Practical and effective
- ✓ Single-use
